

€500-K to 1-M Evergreen BP7

Effective 3/2/21. Subject to change or modification without notice.

OVERVIEW

FROM €500K (607k USD today) to 1M Euro

Funds MOVE to platform for 4 weeks and are then returned. Trader will provide screenshot each week while holding funds to show the client the funds are still in the account. Funds actually reside temporarily in the trader account because it is the only way the trade group gets the credit lines they need to do everything. The credit lines are typically non-recourse, non-repayable and non-depletion.

After client funds are returned, 100% weekly gross for a 3-year contract, so 400% gross monthly (historical returns)

We do a JVA with the client and add for any intermediaries entitled to compensation.

Client sends funds to Wells Fargo, which are then blocked to RBC Luxembourg (for clients outside the US / (if US Bank with credit to RBC if inside the US) **after trade contract is signed by both parties**. 4 weeks from receipt of funds, the client has the funds returned and the next week the client starts to get their non-repayable loan disbursements.

For 500k to 1M, the client is getting a gross weekly payment of 100%, subject to the JVA and escrow agreement.

It will be a 3-year contract, starting with a 40-week contract and two extensions.

PROCEDURES
